

Brianna Godfrey

Product Designer & Software Developer

Charlotte, NC | briakgodfrey@gmail.com

Portfolio: briakgodfrey.github.io/portfolio | linkedin.com/in/briakgodfrey | github.com/briakgodfrey

SUMMARY

Product designer and software developer who takes ideas from user research to shipped code: competitive audits, personas, user flows, and Figma wireframes through to responsive, accessible applications in JavaScript and Python. Computer Science graduate (Summa Cum Laude, 3.9 GPA) with five years of freelance client work.

SKILLS

Design: UX research, competitive audits, personas, journey maps, user flows, wireframing, design systems, accessibility (WCAG), usability testing, Figma, Adobe XD, Illustrator

Engineering: JavaScript, TypeScript, Python, SQL, PostgreSQL, HTML, CSS, SCSS, PHP, React, Node.js, Express, Django, REST APIs, Bootstrap 5, Playwright, Docker, Git, GitHub, Agile/Scrum

PROJECTS

PaySupport

React, TypeScript, Express, PostgreSQL

Design + full-stack development | Payment support dashboard and API

- Built an Express and TypeScript API (raw SQL, JWT auth, audit log) that diffs ledger records against a payment processor.
- Designed a React dashboard that puts the verdict and next step first; WCAG 2.2 AA, strict CSP, 100+ automated tests.

Weekflow

JavaScript, HTML, CSS

Design + development | Weekly planner web app, shipped and in daily use

- Designed and built a single-page planner in vanilla JavaScript, separating state, rendering, and events.
- Added drag-and-drop scheduling, resilient local storage, a Pomodoro timer, dark mode, and JSON/CSV export.
- Used daily by coworkers to run operations; their feedback drives each new feature and fix.

benjamingammage.com Redesign

Wireframe, HTML, CSS, JavaScript

Design + development | Personal website redesign for a client

- Redesigned the site with the owner's input, starting from a wireframe, and wrote the production code he builds from.
- Fixed spacing and animation pain points with a spacing system and reusable animation code; tested across devices.

Helix & Hue Studio

Figma, JavaScript, HTML, CSS

UX case study + development | Responsive salon website (concept)

- Audited three competitor sites, built proto-personas, a journey map, and a user flow, and wireframed phone-first.
- Built an accessible curl-type gallery filter, met WCAG AA contrast and 44px touch targets, and wrote a usability test plan.

Palette

Figma

Product design | Mobile app (concept)

- Designed a four-screen discovery app flow (onboarding, feed, item detail, boards) as one consistent system.

EDUCATION

Bachelor of Science in Computer Science, University of the People

August 2026

GPA 3.9 | Summa Cum Laude | President's List

- **Coursework:** Web Programming, Software Engineering, Data Structures, Databases, Operating Systems (each 1 and 2)

EXPERIENCE

Freelance Front-End Developer

April 2021 to Present | Remote

- Design and build responsive, accessible client websites from requirements through launch, tested across devices.

Operations Lead, RXO

Sept 2025 to Present | Charlotte, NC

Promoted from Logistics Specialist (Sept 2025 to June 2026)

- Validate data across TMS platforms, flag discrepancies, and document outcomes for reporting and process improvement.
- Train teams at other RXO locations, in person and remotely, on systems and processes ahead of new launches.

Earlier roles: Business Retention Representative, Spectrum (2025); Member Service Representative, Professional Assist Corp (2021 to 2023), 95% first-contact resolution.
